THE DAYTONA CHORAL SOCIETY WILL AMEND THE PRIMARY LAW

Gave the Last Concert of the Season Last Night. Large and Appreciative Crowd in Attendance.

The concert given by the Daytona Choral Society last night was the best, in the opinion of musical experts, which has ever been given in the city.

Under the leadership of Mr. Blount the chorus has attained a degree of proficiency seldom acquired by a chorus of such small numbers.

Three concerts have been given and of the three the last one was by far the best, the chorus singing with much spirit, their attack being very good and the balance of parts being much better than ever before.

Mr. Blount deserves much credit for the pains he has taken in teaching the various members of the society. He has been, at all times, courteous and forbearing, and has devoted far more time than could be expected of him in his endeavor to give the public a musical entertainment long to be remembered.

Judging by the amount of applause the last number on the program, "Fold Ye Portals," rendered by the whole chorus, was the most satisfactory of last night's program.

A duet, sung by Mrs. Moore and Mr. Blount was loudly encores, also "Hailmontus Et Accensus" by Mrs. Moore and the chorus.

Enjay & Oatley are painting the new fire hall on north Beach street.

Jas. E. McCoy, colored, was up before the Mayor this morning charged with being drunk and disorderly. He was fined \$5.

March and February each had four Sundays and the dates are similar, the Sundays being on the 5th, 12th, 19th and 26th.

The Brooklyn has arrived in port with W. P. Wharton aboard. The yacht has been on an extended cruise down the East Coast and Mr. Wharton reports that great quantities of fish were caught.

Report of a Special Committee Suggesting Improvements to the Plan Will be Submitted.

The Democratic State Executive Committee will meet at the Everett Hotel, in Jacksonville, on Thursday of next week to receive and act upon the report of the special committee delegated to suggest certain necessary amendments in the primary law.

The special committee is composed of true and tried Democrats, who are heartily in favor of the primary plan of selecting nominees, but they, like most of the Democrats of Florida, see the necessity of changes in order that there will be no frauds at the elections and as little friction as possible.

There is a great deal of difference of opinion as to what changes are most needed, but the opinion prevails that a provision should be made requiring every one eligible to pay their own poll taxes in person. The Legislature must settle the question, and it is believed that this lawmaking body will abide by what the party authority does in the premises.

The sub-committee is composed of the following members: From the First Congressional District, J. M. Young, of Lawrence; William J. Blocker, of Ocala, and L. E. Dozier, of Leesburg. From the Second Congressional District, Charles D. Tuten, of Jasper; W. W. Farmer, of Yulee, and D. F. Fletcher, of Jacksonville. From the Third Congressional District, Chas. E. Davis, of Madison; E. A. Crawford, of Midway, and W. T. Hendry, of Perry.

Mr. McClair is erecting a stable on his property at Silver Beach.

The Sawnee Rifles from Live Oak, the only company from Florida that went to Washington to take part in the inaugural parade, decided not to march, after learning that a colored regiment was to be in the procession. The boys of Live Oak say they do not like the "color scheme" of Washington.

SAVERS OF HUMAN LIFE.

Three Notable Discoveries Made by Japanese.

We are in debt to Japan for at least three notable discoveries, two of which have already saved many European lives, says the London Academy. The oldest of these is the discovery by Kitasato, a Japanese bacteriologist, of the bacillus that causes lockjaw, or tetanus, leading to the production of an antitoxin serum which is now regularly used and is by far the most efficient remedy we possess for this terrible disease.

A Japanese observer named Shiga has recently discovered the bacillus which causes a great many cases of diphtheria, and though that discovery has not yet led to any improvement in prevention or treatment and will, therefore, not lower during the present struggle between Russia and Japan the death rate from that dire foe of the soldier in wartime, no one doubts that this is the first step toward our control of another deadly disease.

The third discovery is really more interesting because it raises newer problems. There is in the body of each of us a pair of organs known as the adrenal glands, yet unknown to the public, though life could not continue without them. It was a Japanese chemist, Takamine, who isolated from these glands the invaluable substance which they produce for the benefit of the rest of the body. It is known as adrenalin. It is the most powerful of all chemical agents for stopping hemorrhage. It will arrest bleeding from the nose when everything else has failed. Not that that much matters, for the nose is accessible to mechanical means, but adrenalin has already saved many lives that were going away in a thin red stream no surgeon could reach.

The Dish That Cannot Break.

It is found—the boon that housekeepers have sighed for, the fatal gift that will drive mad the cook in her tantrums, the dish that cannot break. Mr. McNally, United States consul at Liege, Belgium, reveals to a happy world this wonderful kind of plate, which is made in that town. It is of specially hardened crystal and looks like fine, translucent china. The consul has seen plates of it "hurled to the stone floor of a warehouse and go bounding along the whole length of the building without suffering the least damage." Elastic, immortal! Plunge it in boiling water, then into ice water, and you only improve this plate of genius. You can use it as a hammer for driving nails into wood. In the same town and by the same company is made glassware equally robust and immune from fracture. Glass and china are no longer to be marked "perishable." But how will cook receive her feelings now?—Everybody's Magazine.

The World's Savings Banks.

In the savings banks of the world \$2,640,000 depositors have over \$10,500,000,000 to their credit, says the department of commerce and labor through its bureau of statistics. This is the detailed record of the larger countries: United States, \$3,090,178,611; Germany, \$2,273,406,226; United Kingdom, \$1,666,854,253; Austria, \$876,941,935; France, \$847,224,010; Italy, \$482,263,472; Russia, \$445,014,951; Hungary, \$432,810,515; Denmark, \$236,170,057; Switzerland, \$193,000,000; Australia, \$164,161,581. The average deposits range from \$418.80 for the United States to \$5.48 for Japan. Canada is second with \$280.14. The deposits per capita of population vary from \$96.41 for Denmark to 15 cents for Italy. The American per capita is \$37.38. The Japanese per capita is 90 cents, the Russian \$3.16 and the Canadian \$10.99. Switzerland is second with \$92.26.

A Paradox.

"So you think you see an opportunity," said his friend. "See an opportunity?" said the enthusiastic person. "Yes, sir! And I tell you, it's out of sight!"—Chicago Inter Ocean.

His Dream Worth Thousands. Andrew Sabel, twenty-one years old, employed in the Keystone flour mill at Nanticoke, some time ago in a dream saw an invention for separating foreign substances from grain just before it was ground. He told some friends and asked their assistance in making it, but they laughed at him. Preserving a clear conception of the invention in his mind, he went to work, built a model, got a patent on it last month and has now received an offer of \$10,000 for the patent rights from a Massachusetts firm. The principle of the invention is magnetism. It removes foreign substances from the grain and averts accidents to the grinding machinery.—Wilkesbarre Dispatch.

Deadly Absinth.

Statistics show a steadily continuing increase in the consumption of absinth in France. Between 1885 and 1892 there was an increase of 85,000 hectoliters. From 1892 only four years more were needed to add another 85,000 liters to the consumption. A recent experiment demonstrated that six drops of essence of absinth in three gills of water were as deadly to fish life as six drops of prussic acid in the same quantity of water. London Globe.

Vegetarian Wolves.

One of the most extreme vegetarians in the well known Russian sculptor, Prince Troubetzkoi, who recently visited Paris. He considers meat eaters not much better than cannibals, tobacco even eggs and milk and lives on vegetables boiled in oil, salads, fruits and bread. At his home in St. Petersburg he has a number of animals, including a bear, two wolves and nine dogs, none of which is ever allowed to eat meat. Kansas City Journal.

An Irish King of Portugal.

An Irishman was once king of Portugal, or at least he once ruled in the king's stead over that country. In November, 1640, there was a revolution in Portugal, brought about by the tyrannical exactions of Miguel Vasconcellos, the secretary of state. The hated minister was shot and the vice queen, Margaret of Savoy, abdicated. The crown was offered to the Duke of Braganza, who was living at Villavieja. Meanwhile, until the duke could accept the crown, the people of Lisbon elected a popular and influential Irish merchant, named John Darcy, who resided in the city, as their nominal king. Darcy accepted the honor conferred upon him and bore the title of "king of Portugal" from Dec. 1 to Dec. 6, 1640.

Living Stones.

The visitor to the Falkland Isles sees scattered here and there singular shaped blocks of what appear to be weather beaten and moss covered boulders in various sizes. Attempt to turn one of these boulders over, and you will meet with a real surprise, because the stone is actually anchored by roots of great strength; in fact, you will find that you are trifling with one of the native trees. No other country in the world has such a peculiar "forest" growth.

Hopeless Case.

"Do you enjoy classical music?" asked the young woman. "Yes, miss," answered Mr. Cunnors; "I enjoy it much, but I never can get over the idea that the tunes would sound better if they were played by a mandolin or banjo club."—Washington Star.

Nearer the Mark.

Briggs—Do you believe that the world is divided into two classes—those who borrow and those who lend? Gregory—No, sir; my experience is that two other classes are much more prevalent—those who want to borrow and those who won't lend.

What We Get.

If I am asked the question, "Do we get our deserts?" I will boldly answer, "No, we don't, and we never shall, speaking of humanity as a whole and taking account of the preponderating multitudes to whom life is only another word for misery." But if I am asked, "Do we get what is best for us?" I say, "Yes, always and everywhere, taking our lives through and through, and having account not merely for our material, but also for our spiritual welfare."—Hall Caine.

CANDIDATE FOR CHEAP HONORS

St. Augustine Beach, A Prototype of Virginia Beach, Wants Racers to Come There.

The attention of the automobile world and the general public that are interested in the sport was attracted to Florida less than three years ago by the work done by Mr. Hathaway, who first saw the possibilities of great speed in the Ormond-Daytona beach.

The succeeding tournaments have not belied his judgment as to the great record-breaking possibilities on the Florida sea sand, and these annual winter tournaments have done much in a publicity way for the Florida East Coast, and it has attracted thousands of people to Florida, and other thousands will undoubtedly be added to them before the automobile races and motor boat races are many years advanced.

Virginia Beach was a candidate for racing honors last season and autos went there to try to break records, but got stuck in the sands. Now comes St. Augustine, ever deserving cheap advertising, with a narrow, soft sand beach bidding for the racers. The Ormond-Daytona contingent confidently look for a fiasco then similar to the one which occurred in Virginia.

Florida has no beach comparable with the Ormond-Daytona beach. The fastest time ever made for all distances was made on this course, and just as long as manufacturers of autos desire to break records or see what their machines can do they will come to this beach.

Using a Coat Hanger.

Many years of hard work on the farm had made the old man round shouldered, and his coat fitted badly. His son in the city sent him a coat stretcher on which to hang the coat at night. On his next visit to the farm the young man asked how the coat stretcher worked. His father looked a little embarrassed and then confessed, "I can't stand it on," said he. "It was real good of you to send it. Your mother fastened it to my coat with tape, but I wasn't comfortable in it, and I had to take it off."

EUCHRE PARTIES LAST NIGHT.

A Large Number of Contestants Struggle for the Valuable Prizes That Were Offered.

The parlors and foyer of The Ridgewood were crowded last night with the ladies and gentlemen who contested for the valuable prizes offered.

Mrs. Stamets, the winner of the lone hand prize, secured a silver souvenir spoon.

Mrs. Doyle secured the ladies' first prize, a silver orange knife. Mrs. McKay won the second prize, and Miss Overton the third prize, a hat pin.

The victorious players for the gentlemen's prizes were Victor Bird, Mr. Smith and Mr. Millard, the prizes being a beautiful water color painting, a silver match safe and a book of Florida views.

Consolation prizes were given to Mrs. Gimbel and Mr. Millard.

The party was in charge of Mesdames Millard and Fairchild, who ably conducted it and saw that each and every one spent a pleasant evening.

A five table euchre party was given at Schmidt's Villa last night. Mrs. Geo. Schmidt was the winner of the ladies' first prize.

F. Flanagan, of New York; Mrs. Henry Schmidt and George F. Crouch were the next highest in the order named.

Refreshments, consisting of punch and cake, were served, and vocal selections were rendered by Miss Mary Watson.

Frank Boyleston, the popular traveling agent of the Atlantic Coast Line is in the city.

An important meeting of the Halifax River Yacht Club will be held tonight.

First Lieutenant Fred Caldwell will probably be elected captain of the Halifax Rifles at the next meeting.

Ready to Wear Goods

OUR LARGE STOCK OF
